PRIVACY PRACTICES

This notice describes how medical information about you may be used and disclosed and how you can get access to this information. Please review it carefully.

The United States Department of Health and Human Services, effective August 9, 2022, issued a comprehensive federal regulations providing for protection of private medical information with which our office must comply. The final regulation, which went into effect in April 2003, is designed to protect patient's identifiable health information. These protections are part of the Health Insurance Portability and Accountability Act of 1996 (HIPAA). (If more stringent laws exist, these must be observed.)

The HIPAA privacy rule states that after April 14, 2003, health providers must provide patients with a written Notice of Privacy Practices and make a good faith attempt to obtain a written acknowledgment of such. This information should be provided to patients prior to or at the time of the first delivery of health services, except in cases of emergency. However, if a written acknowledgement is not obtainable, the attempt by the provider to obtain it is sufficient to comply with the rule.

In addition, a Notice of Privacy Practices must be displayed prominently and available for patients to take home. If the Notice is modified in the future, the new version must be displayed and available, and thereafter provided to patients at the time of their first treatment.
